

# Devil You Can Drive

Jorn

We need a devil we can drive  
To control the beast inside  
Demon machine gonna lift us high  
Our ambition is pushing us to the sky  
Gonna burn and fly

Material man with his greedy mind  
Breeding thoughts of the darkest kind  
Building memories of a life in crime  
You know his heart is mine

Burning strong my firewar  
I am warrior to the core  
Like the howling wind I scream on  
Born on soaring wings of dreams  
I'm a glider through the schemes  
Taken over by machines  
But my spirit stays unbroken  
Aahh... And my dragon heart flies free... Yeah  
It's the fire in me

The world is a digital spider  
Spinning its bridges to hell  
Sold our souls to the decider  
Losing hearts to the wishing well  
How can we break the spell

Give us a lifetime to appreciate  
Away from trouble we still navigate  
Steady on the wheel don't let your mind break  
You'll know which way to take

On this road of compromise  
We must burn and sacrifice  
Eyes of vision skies that dream on... yeah  
After clouds have gathered round  
Pouring rain on every frown  
There's a rainbow to be found  
And your blackened heart will open  
People preach about the light  
And what they believe is right  
But your heart will talk to you, don't let it die

One more bullet from a soldier's hand  
Expendable troops fighting for the land  
Another victory for the general in command  
Sons and daughters  
Sacrificed for the masterplan...  
Bleeding in the sand

Eat the blame and stay alive  
Swallow evil to survive  
We all need a devil we can drive  
To speed from the pain inside

Without a safety rope  
We are hanging by the hope

Still believing as we stride on... yeah  
And when the wolves are at the door  
But you cannot give them more  
Keep your faith and fight the war  
Let the truth be spoken  
Holding strong my firewall  
I am fortress till I fall  
And I'll sing my songs for you until I die  
... you'll hear my cry
