

## Storm

José González

Send me your position  
It's getting lonely down here  
Things I've been up to lately  
Have kept me from seeing clear

Why do you keep on running?  
This love is fading way too fast  
All the stars are burning for you  
But none of them is going to last  
So stop chasing the past

As soon as the storm is over  
And all the fog is clear  
As soon as the storm is over  
I've promised to send out for you

As soon as the storm is over  
As soon as the storm is over  
As soon as the storm is over  
As soon as the storm is over
