

# While You Were Sleeping

José James

[Verse 1]

Shadows long upon my face, Shadows long upon my face  
She's gone on the last train  
Never thought that she would go, Never thought that she would go  
Now I'm all on my own

[Chorus]

Oh I've been hit, The love affair is over  
And I know that I'm alone

[Verse 2]

Need a day I need a night, Need a day I need a night  
I know I'm gonna see the light  
Lover's darkness on my head, Lover's darkness on my head  
And it's all a shade of red

[Chorus]

Oh I've been hit, The love affair is over  
And I know that I'm alone

[Verse 3]

If you think that I'm afraid, Never knew what I am made  
Remember all the things in you, And everything you put me through

[Guitar Solo Bridge]

[Verse 4]

Here's a little lullaby, wash your tears and don't you cry  
Cause you are inside of me, Leave my heart and let me be  
In your lonely crowded life, to a place beyond the sky  
Where our love won't fade away, Waiting to be born again, Waiting to  
be next to me  
Weight of sorrow weight of gold, way our words can now unfold  
Way you couldn't let me stay  
Live my life and walk away, I'll be there and so will you  
When the known is in its power, when the young is in its flower  
You reached out to fill a need  
Walk away in word and deed, go and haunt my dreams no more  
In a silence, in a room, In a quiet, in a mood  
I'll remember everyday, that your promise never gave, never to return  
again  
Those in love do what they need, Light a candle, plant a seed  
I'll return when things have changed, Live and die and born again, Th  
rough the night and through the way  
Painted pictures in your mind, Can you leave it all behind  
Loss and love and live again, Shake my hand and call me friend, Hate  
will be the death of you  
Stranger sorrow let me go, Down a dark and lonely road  
Ways of light to show my way, Ways of love to heal my pain  
All of this I ask in you...
