## **Machines Of War**

**Joseph Arthur** 

Now I'm leaving to fly in a warplane Hitler's coming and he is a madman I'll be back though so care for our children Tell them Daddy has left to protect them now

On a mission the sky is a blood field On a mission you see what our bones yield Raining bodies, the jet planes are falling I gotta go now the army is calling me

Time is a jet away Wish you would lock the door See how our children play We are machines of war You copy you paste you lose Love couldn't make me stay I couldn't love you more Just watch how our children play We are machines of war

The factory will give me my job back If I make it out of a casket If I make it I hope you'll be waiting With the kids and the love never fading out

When you wake please give them a kiss now When you wake them please tell them i miss them And when i'm gone please show them my picture They are so young I hope they remember me

Time is a jet away Wish I could give you more See how our children play We are machines of war

Love couldn't make me stay I couldn't love you more Just watch how our children play We are machines of war
