

Oceans

Joseph Vincent

Can't you hear the ocean cry
Calling out to be revived
Take a step back realize
We all need to make a plan
Reverse effects of common man
Take a moment to open your eyes

We're taking our time can't keep running running
Take the water into your hands
I'm feeling a change that is coming coming
The sooner that we understand

Just a drop of rain
That's all I am and we're all the same
We have the power to make a wave
If we move together as one

There is no time to waste
Actions are louder don't hesitate
And I see the future it's ours to take
We are the oceans
We are the oceans
We are the oceans

When there's nowhere left to go
In a world where nothing grows
Make a choice to sink or swim
Fields of blue are turning black how did we get so off track
Across our seven seas

We're taking our time can't keep running running
Take the water into your hands
I'm feeling a change that is coming coming
The sooner that we understand

Just a drop of rain
That's all I am and we're all the same
We have the power to make a wave
If we move together as one

There is no time to waste
Actions are louder don't hesitate
And I see the future it's ours to take
We are the oceans
We are the oceans
We are the oceans

Just a drop of rain
That's all I am and we're all the same
We have the power to make a wave
If we move together as one
