

# Stardust

Joseph Vincent

Through all of time and space  
I'd always rearrange  
Everything around me, so things would go as planned  
But I found clarity  
Some things aren't meant to be  
Take it as you go on  
Your future's in your hands  
And all we want is love  
So as I look above

Oh it's the stardust in the sky that  
Makes me realize that  
I'm not the only one  
And just know that dreams come true  
So make sure every single thing that you do  
Just take your time  
And look up at the stars tonight

I've never wanted more than  
To show the world what I can do, to make them see  
That we're just all unique in our own ways  
To do what we were made to do  
And it's our destiny to find out what we were meant to be  
I look up and I see that...

It's the stardust in the sky that  
Makes me realize that  
I'm not the only one  
And just know that dreams come true  
So make sure every single thing that you do  
Just take your time  
And look up at the stars tonight

Yeah if you're on your own  
And don't know where to go  
Just know you're not alone  
Just know you're not alone  
Said if you're on your own  
Well you can make it home  
Just know you're not alone  
And one thing that's for sure  
If you could ask for anything more  
Just take your time  
And look up high  
It's in the stars tonight
