

# Miracle

Josh Rouse

Hurry up we're gonna be late  
I can't wait to see this place  
And if we leave now  
We could be there soon

On the drive, you did not care  
You're sun-tired and your stomach's bare  
When your eyes light up  
And out of the blue you scream

It's a miracle  
And I'm here to say  
It's a miracle  
And I'm here to tell you now

Wake up, we're almost there  
Ten more miles it was such an affair  
That in all our lives  
Waited for this day

And there it is, it's shining like gold  
A little different than the one before  
And who would've though  
That you would contemplate

It's a miracle  
And I'm here to say  
It's a miracle  
And I'm here to tell you

Miracles  
They don't feel this way  
It's a miracle  
And I'm here to tell you now

All of the work is begun  
The babies comes one by one  
We lie in the mid day sun and say

All of the work is begun  
The babies comes one by one  
We lie in the mid day sun and say

This is a miracle that we're here today  
A miracle  
And I'm here to tell you

Miracles  
They don't feel this way  
It's a miracle  
And I'm here to tell you now
