

Vegetable Car

Joshua Radin

Baby, you don't even know me
But one day I'll get up the courage as you pass by You'll see
Oh baby, one look just might save me
I need you to slow by the corner, stop right in front of me

Till then I see you hopefully through
I do wish that you'd ask me to ride along
It wouldn't be wrong to tell more than I know about you

She drives a vegetable car
Diesel Mercedes green 2-door
I barely know who you are
Lisa Loeb glasses, I'd sure like to ask you to stay

Baby, I need you to save me
The one thing that my heart requires is that you admire me

Till then I see you hopefully through
I do wish that you'd ask me to ride along
It wouldn't be wrong to tell more than I know about you

She drives a vegetable car
Diesel Mercedes green 2-door
I barely know who you are
Lisa Loeb glasses, I'd sure like to ask you to stay

How do I know why the sight of you makes me weak
Each time I see you turn on to my street
Your hair is always up in a bun
This girl's the one

She drives a vegetable car
Diesel Mercedes green 2-door
I barely know who you are
Lisa Loeb glasses, I'd sure like to ask you to stay

Don't go
