

Alone On The Moon

JOY.

Take me back
Any road is better than the one that
Led me here (mmmm)
Take me back
To a time that I remember, I've drifted
Further than the atmosphere

I'm alone on the moon
I don't know what to do
I'm alone but with you
I'm alone on the moon

Messages from you and your other side
How you switch from day to night
Messes with my mind
But I'm holding on, regardless of the outcome
'Cos if I fall from here
I might never see the sun

I'm alone on the moon (on the moon)
I don't know what to do (what should I do)
I'm alone but with you
I'm alone on the moon

I'm sitting in this feeling, an eclipse in the dark (oh)
Everything I've been experiencing - I can't change that
So I'm living in the memory of what we had
And I'll play it on repeat when I can't get back

I'm alone on the moon
I don't know what to do
I'm alone but with you
I'm alone on the moon

I'm alone on
