

I harbour envy, for your touch  
I take the way you look at her, and  
Picture you looking at me  
All I do  
Every little, little thing  
I do for you, I do for you

Just name the time and place  
Or who you want me to be  
Who you want me to be  
For you I'm you

Who, whoever you want, whatever you want, whoever you want  
For you I'll be  
Whoever you want  
Whatever ever you want  
Whoever you want  
For you I'll be

My palms are empty  
For you I must  
Live in the shadow of your touch  
And mix the juice up with the leaf  
All my blues  
Could never ever ring off key  
I sing for you  
I sing for you

Just name the time and place  
Or who you want me to be  
Who you want me to be  
For you I'm you

Who, whoever you want, whatever you want, whoever you want  
For you I'll be  
Whoever you want  
Whatever ever you want  
Whoever you want  
For you I'll be
