

Weather

JOY.

Just give me one-on-one time
To take you away from the cold
I know I'm the only one
That you want to hold

Took yourself away
Let's just see what these clouds do
When is the next time I'll see you?
You took yourself away
When will we be together?
I couldn't change the weather

You took yourself away

I tried to take you from the cold
You left me at seventeen years old
Why didn't I see the signs
Why couldn't I read between the lines
The storms in your head will keep on fighting
First rain, and now comes the lightning
Why couldn't we be together
I'm sorry that I couldn't change the weather

You took yourself away
