## 7 Year Itch

Joy Denalane

This must be our 7 year itch There's so much we need to renew All the changes we've been through We've got to strengthen every stitch Our Problems are more than a few But above all you know I love you Remember it was such a beautiful day When suddenly you came to me And loving you set me free Singin along as the music played Feeling every word that Mary sang And I knew that you were my sweet thing

Mary sing a song for me Remind us love is all we need You can help us steal away So I can tell him that I'm here to stay

Now we've got to straighten this out It's like we went from love at first sight To fighting almost every night This thing has turned into a drought But it's nothing that we can't make right Cause I know I, I need you in my life It's obvious we're both to blame I know it's hard to share my world sometimes Why do we put love on the line We can't keep playing all these crazy games With you it's always not today So baby, this is all that I can say

Mary sing a song for me Remind us love is all we need You can help us steal away So I can tell him that I'm here to stay

I don't see myself with no one else But I can't take this drama no more If you look deep inside yourself You'll see it's easy just to give me you Been willing and waiting for a long long time Now I feel like I'm going down This family affair is on my mind Memories of a love so true, ohhh

Mary sing a song for me Remind us love is all we need You can help us steal away So I can tell him that I'm here to stay
