

Rocket Science

Joyce Wrice

It's not rocket science
Just gravity
When we get down
It's not rocket science
Just gravity
When we get down
It's not rocket science
(It's not, it's not)

I can't enough of you
'Cause I'm so used to
Being so complicated
But when I'm with you
I don't feel the need to
Question anything
I can't ignore it
I'm caught in your orbit
Pull me in, because I won't fight
My problem solver
The one my world revolves for
Moving at the speed of light

It's not rocket science
Just gravity
When we get down
It's not rocket science
Just gravity
When we get down
It's not rocket science
(When we get down)

It's all yours
This entire universe
Just yours and mine
Just yours and mine
Just yours and mine
Just yours and mine

Rocket science
It's not rocket science
Just gravity
When we get down
It's not rocket science
Just gravity
When we get down
It's not rocket science
(Yeah, oh, oh, when we get down)
