

Stay Around

Joyce Wrice

It's hard to tell
If this is really love or if it's just how it feels
But you treat me so well
If it takes more time
I've got time to kill

See you treat me like a real man treats a lady
And you know just what to say when I'm acting kind of crazy
And whenever I'm feeling lost you're there to save me
So I'm headed wherever it is you wanna take me
Take me
Take me

There's something in our chemistry
I feel it when you're next to me
I wasn't looking for love but love is what I found
I just hope that you stay around

I know it's you
Baby I don't need nobody to tell me it's true
Everything you do
Can't get no better
Better than you ooh no

See you treat me like a real man treats a lady
And you know just what to say when I'm acting kind of crazy
And whenever I'm feeling lost you're there to save me
So I'm headed wherever it is you wanna take me
Take me
Take me

There's something in our chemistry
I feel it when you're next to me
I wasn't looking for love but love is what I found
I just hope that you stay around

I just hope you (Stay Around)
I just want you (Stay Around)
I just hope you (Stay Around)
I just want you (Stay Around)

There's something in our chemistry
I feel it when you're next to me
I wasn't looking for love but love is what I found
I just hope that you stay around
