

# Hold It Together

JP Saxe

When I left your house the first time  
I had this feeling like I'd left something behind  
I checked both of my pockets, had my keys and my wallet, had my necklace and my phone  
How am I missin something that I didn't know existed like a week ago?

When I kissed your lips the first time  
I had this feeling like I'd left something behind  
I spent eighteen months thinking I was messed up and I'd never learn to let it go  
Now here you are shaking the fear that love could only ever be what I've already known

I say the right thing  
It's kinda my thing  
Losing myself tryna fix everything  
It's shit from my past  
I know you get that  
It's just what I've learned  
And all that I've had

Love don't work if I don't hold it together  
It all gets worse if I don't hold it together  
And I'm afraid to love this way forever  
I wanna let you know me ways I never would've let her  
Take my heart and we can hold it together

This is nothing like the first time  
You don't remind me of a thing  
And we both got memories, but when you're next to me all that I see  
Is you in front of me

I say the right thing  
It's kinda my thing  
Losing myself tryna fix everything

Love don't work if I don't hold it together  
It all gets worse if I don't hold it together  
And I'm afraid to love this way forever  
I wanna let you know me ways I never would've let her  
Take my heart and we can hold it together

Could this work if I don't hold it together  
Of all my habits I just like you better  
I wanna let you know me ways I never would've let her  
Take my heart and we can hold it together  
Hold it together  
Hold it together
