

# Forever

Juan Karlos Labajo

As you walk down the aisle  
I should give me that smile  
As I watch your mother cry  
Her princess is a grown up girl now

As you look me in the eye  
As I look back in time  
Back when I never knew you  
Never thought that you will be mine now

We were just strangers  
Two different people  
Never knew of your existence  
Now we are together

Cuz you made me believe in forever  
You kept me warm in my cold December  
You will be mine, and I'll be yours  
Until the end of time, and I  
As I kiss your lips  
While I close my eyes  
I will fall in love again with you  
With you

When we get back home  
I'll give you the remote control  
And you can lay your head  
As we watch your favorite show  
I'll spend time with you  
Pillow fight until the night falls  
Maybe get drunk with you  
And do some stuff we should not do

We were just strangers  
Two different people  
Never knew of your existence  
Now we are together

Cuz you made me believe in forever  
No, you kept me warm in my cold December  
You will be mine, and I'll be yours  
Until the end of time, and I  
As I kiss your lips  
While I close my eyes  
I will fall in love again with you  
Fall in love

We were just strangers  
Two different people  
Never knew of your existence  
Now we are together

You made me believe in forever  
No, you kept me warm in my cold December  
You will be mine, and I'll be yours  
Until the end of time, and I  
As I kiss your lips

While I close my eyes  
I will fall in love again with you
