Death

Judas Priest

I will take your final breath And I will be your last regret Cold blood runs in my blackened heart Tearing every soul apart

Messenger of death wields the scythe Of man's damnation Messenger of death holds his blade For termination

Sin is all I feast upon I'm forging my crematorium Your tomb is waiting here for you Welcome to my ritual

Messenger of death wields the scythe Of man's damnation Messenger of death holds his blade For termination

Death rides out from the storm Deface humanity There's no escape from this Human calamity

Death rides out from the storm We turn to God and cry Ignored we turn to face This vengeance from the sky

Death rides out from the storm No time left to repent No quarter, no escapes No line of self defense

Death rides out from the storm In terror we confess Our voice is heard no more His deed is merciless

Death rides out from the storm Deface humanity There's no escape from this Human calamity

Death rides out from the storm We turn to God and cry Ignored we turn to face This vengeance from the sky

Messenger of death wields the scythe Of man's damnation Messenger of death holds his blade For termination
