

Lost Love

Judas Priest

I carry with me all the love that you give
You brought me serenity, a reason to live
Our life is a journey that we took from the start
We made all these memories together

I can remember the first time that we met
The feelings you gave to me, I'll never forget
I knew from that moment when our love first began
We'd last 'til the end of time, forever

And though there were bad times
We stood by each other
And did what we had to get through

You live in my heart when you're far away
I see you in dreams where I hear you say
"I'm with you forever, in true love
By light of the day and stars above."

And when there were bad times
We held on each other
To face what we had to get through

You live in my heart when you're far away
I see you in dreams where I hear you say
"Look up to heaven and I'll be there
Still guiding your heart, still saying our prayer."
