

# Rising From Ruins

Judas Priest

Drawn from years of self denying  
Lost in chaos before the storm  
Our strength goes on prepared for mortal battle  
We can settle our old scores

Look to the skies and challenge all of heaven  
Resist the devil, dare to dream  
By grace of god within our hearts eternal  
For our salvation is for everyone

We're standing as one  
We're carrying on  
Rising from ruins  
We're bringing the light  
Out from the night  
Rising from ruins

We'll face our foes so they can hear our voices  
The land rejoices in empathy  
This trial by fire will build from their attrition  
It's ammunition for our enemies

We're standing as one  
We're carrying on  
Rising from ruins  
We're bringing the light  
Out from the night  
Rising from ruins

Send in the valiant, fight for what you believe  
Then we shall overcome, lay victory at our feet

We're standing as one  
We're carrying on  
Rising from ruins  
We bring the light  
Out from the night  
Rising from ruins

We're standing as one  
We're carrying on  
Rising from ruins  
We're bringing the light  
Out from the night  
Rising from ruins
