The girl in my dream  
The girl from my dream  
Is sitting right next to me, next to me  
Is sitting right next to me, next to me  
The girl in my dreams  
Is sitting right next to me, next to me  
If I'm being honest, let me be honest  
Baby, we're beyond this  
All these petty arguments, a plus and a minus  
The feeling is timeless  
Yeah, I fucked up in the past, but let's put it behind us, yeah

Shout your name in hills and the valleys  
Whole world's gonna know you love me  
Scream your name across the galaxy  
Now the universe know that I'm on the same thing  
Shout your name in hills and the valleys  
Whole world's gonna know you love me  
Scream your name across the galaxy  
Now the universe know that I'm on the same thing

Now the universe know that I'm on the same thing  
Now the universe know that I'm on the same god damn thing

Her name in my brain  
I'll never leave her alone, no way  
No, you can't go back home, you're with me  
When you're not here, can't sleep can't breathe  
Can't think, I can't seem to think of a world without we  
Vision clouded, you need me  
I need you more

The girl in my dream  
The girl from my dream  
Is sitting right next to me, next to me  
Is sitting right next to me, next to me  
The girl in my dreams  
Is sitting right next to me, next to me

Shout your name in hills and the valleys  
Whole world's gonna know you love me  
Scream your name across the galaxy  
Now the universe know that I'm on the same thing  
Shout your name in hills and the valleys  
Whole world's gonna know you love me  
Scream your name across the galaxy  
Now the universe know that I'm on the same thing
