

I was reaching for heaven  
It became my obsession  
But I guess it was more like a curse and less like a blessing  
And it was perfect on paper  
But there weren't any layers  
And how can a kiss of an angel feel more like a stranger?

I try to take it all away  
Take it all away  
But it all went up in flames  
And I fell hard like

Icarus  
I got too close to your heart and now I've turned to dust  
I didn't know that your love could be so dangerous  
And all your golden promises they just turn to rust  
And I got burned like Icarus  
I got burned by your love

Stop what you're sayin'  
I'm done with the stayin'  
You're not gonna pull me in  
I'm finally awaken  
I finally see you for who you are  
And not the person I thought you were  
And maybe you just drop things to watch how they're breakin'

I try to take it all away  
Take it all away  
But it all went up in flames  
And I fell hard like

Icarus  
I got too close to your heart and now I've turned to dust  
I didn't know that your love could be so dangerous  
And all your golden promises they just turn to rust  
And I got burned like Icarus

Gotta let go, gotta let go  
Gonna wash the poison off of me, oh oh  
I'ma let go, I'ma let go  
Watch me as I'm flyin' away from your love  
Mmm, flyin' away from your love

Like Icarus...  
I got too close to your heart and now I've turned to dust...  
I didn't know that your love could be so dangerous  
And all your golden promises they just turn to rust  
And I got burned like Icarus  
I got burned by your love  
Burned like Icarus  
I got burned by your love

And I got burned like Icarus
