

# Ghost

Julia Wolf

I don't mean to ghost you, but I will  
Can't fuck with people who have too much time to kill  
You like to argue when you really need to heal  
Don't be mad if I don't stick around and chill  
Running uphill

Got my headphones on real loud  
When I'm walking always keep my head down  
When I'm strumming I just want a nice view  
Always pictured stained glass windows in my room  
'Cause I don't ever really leave the house  
Went through a phase where the music kept me round  
Lost a few friends, maybe lost a few pounds  
I sing to myself when I'm feeling down

I don't mean to ghost you, but I will  
Can't fuck with people who have too much time to kill  
You like to argue when you really need to heal  
Don't be mad if I don't stick around and chill, yeah

I don't mean to ghost you but I will  
Can't fuck with people who have too much time to kill  
You like to argue when you really need to heal  
Don't be mad if I don't stick around and chill  
Running uphill

I'm running running running running  
My endorphins aren't working so I  
Keep on working  
Got an angry voicemail on my phone  
You're so mad  
You're not getting back  
What you think you deserve  
Take it out on me  
Take it out, take it, take it out on me  
I can handle what you say  
Brush it off you know that's my way  
Hey ooo that's my way

Ghost so I ghost  
Ghost so I ghost  
Ghost so I ghost

I don't mean to ghost you, but I will  
Can't fuck with people who have too much time to kill  
You like to argue when you really need to heal  
Don't be mad if I don't stick around and chill  
Running uphill
