

Better

Julie Anne San Jose

They told me
I should be careful around you
Some people didn't like you
You said nobody's to blame for the situation
But I said you want me
You're my sweetest addiction
My friend would warn me
Had a bad intuition

Ooohh
I didn't give a damn about it
Ooohh
I would be the one to save you

Better, better, better, hey
Better, better told them that you were better
Better, better, better, hey
Better, better, better for me

I was yours for the taking
But you're manipulating
In a moment of weakness
I still find myself kissing you
You'd say that you're different
From the others I was with
You say that you love me
But you purposely hurt me

Ooohh
Baby this could be our downfall
Ooohh
I know without you I will be

Better, better, better, hey
Better, better, told them that you were better
Better, better, better

I'm off of your circus
And your bed of roses
I'm used to being used
Tryna play the fool
Cause I thought I was the only one
The only one
You treated me like I was just for fun
That wasn't fun
While you out there vibin
All the girls you're tryin
Tryna fool around with
No I didn't deserve this
I wish you all the best
'Cause this is good bye
I'm movin on without you

Better, better, better, hey
Better, better, told them that you were better
Better, better, better, hey
Better, better, boy you know I'll be better

Better, better, better, hey
Better, better, told them that you were better
Better, better, better, hey
Better, better, told them that you were better
