

Fire

Julie Bergan

You take the bar, set it high
You push the limit and go passed the sky
You light that fire, baby, deep inside
You take the bar, set it high
You push the limit and go passed the sky
You light that fire, baby, deep inside
When all goes black you're the light

You can bring at the striking hour
You're pulling me up till I can't come down
You're running so deep and there ain't no doubt
You do it so well, baby, take a bow

When they all come out to play
You thought there's nothing left to say
You got me going all the way

So put me to the test
And I'll be standing at the end
You got me learning from the best

You are the fine thing that's hard to find
Baby, you're the wind that can take me up
And I ain't never coming down
You're the fire, the fire

You're shooting in the dark
I'mma be a shooting star
You're a fire, a fire
Baby, lead it all the way, I'm your protege
I'm your protege

You got that stare, baby, coldest eyes
I'm losing my breath, I should close my eyes
You're making me nervous the way I like
Pull that trigger, come and blow my mind

Sit me up on your pedestel
Oh, you know how to do it so good
Treating me nice, just the way you should
I think that line till it's understood

Put me to the test
And I'll be standing at the end
You got me learning from the best

You are the fine thing that's hard to find
Baby, you're the wind that can take me up
And I ain't never coming down
You're the fire, the fire

You're shooting in the dark
I'mma be a shooting star
You're a fire, a fire
Baby, lead it all the way, I'm your protege

Pull me up and I ain't never coming down

You're the fire, the fire
Pull me up and I ain't never coming down
You're the fire, the fire

Pull me up and I ain't never, never coming down
You are the fine thing that's hard to find
So pull me up and I ain't never coming down
Fire

You are the fine thing that's hard to find
Baby, you're the wind that can take me up
And I ain't never coming down
You're the fire, the fire

You're shooting in the dark
I'mma be a shooting star
You're a fire, a fire
Baby, lead it all the way, I'm your protege
