

Treat Me Good

Julie London

Treat me good
I've never ever been in love before
Treat me good
This is the first time romance knocked on my door

I never had someone to cling to
To show me the effects of love
I never had someone to bring to my attention
The magic in the stars above
Treat me good

There are so many things I don't know
But if you would teach me to love you
I sweat that I won't be slow

And darling forever we'll be together
If that's what's on your mind
Just treat me good
Treat me good
And I'm yours 'til the end of time

Treat me good
And I'm yours 'til the end of time
Treat me good

Treat me good
Then I'm yours 'til the end of time
Treat me good
