

# Uninvited

July Talk

We came here uninvited  
Our blood gets so excited  
I can't feel my body anymore  
I can't tell where your voice is coming from

Heard about it your mothers note of place  
Felt the beat better lighting up your voice  
She wants me but she's married  
Looks good let's not get carried away

So they left us to the night again  
I'd rather make it mine  
I just wanted you I needed you to know  
I just wanted you I needed you to know

And we know we say I told you so  
We do this all the time

I just wanted you I needed you to know  
I just wanted you I needed you to know

Are you okay to travel through the crowd  
I'm alright but these lights are way too loud  
Nothing wakes me up like you do  
Nothing wears me out like you do

New air is entering our lungs  
And we're speaking with brand new tongues  
No one gets it quite like you do  
No regrets lets see this night through

When I lose you in the crowd tonight  
No one gonna be fine

I just wanted you I needed you to know  
I just wanted you I needed you to know

So if you see something that you like  
Tell me what you find

I just wanted you I needed you to know  
I just wanted you I needed you to know

Just wait  
Just wait  
Just wait  
Just wait  
Just wait

Thanks for calling I made it under time (Just wait)  
Thanks for holding I made it up your line (Just wait)  
No one wakes me up like you do (Just wait)  
Nothing wears me out like you do (Just wait)

And I'll find you in the crowd tonight  
Just like everytime

I just wanted you I needed you to know  
I just wanted you I needed you to know

All the come down kids will fall apart
