

## play with fire

juno

I'm way too open, baby, what you want to know?  
You're so ambitious, but you don't know where to go  
You're sick of doing everything that you've been told  
And I can break that mold for you

Cold hearted lady, I could be your fire place  
I, I came to be your guy  
It drives me crazy all night thinking 'bout how you're just  
You're scared to play with fire

You're scared for what? (I'll know, girl)  
You're scared for what? (Just tell me, baby)

You take a look around, my baby crying now  
Our lives won't be the same  
And I made up my mind, there ain't no time to waste  
This city need some fire, baby  
Let's give them a taste, just hear me when I say  
We've been here crying, where has that gotten us?  
They do not have our trust, I see your bubble bound to burst  
They play us for the worst  
And I know all about it, honey, I could tell you first (Oh, baby)

I'm way too open, baby, what you want to know?  
You're so ambitious, but you don't know where to go  
You're sick of doing everything that you've been told  
And I can break that mold for you

Cold hearted lady, I could be your fire place  
I, I came to be your guy  
It drives me crazy all night thinking 'bout how you're just  
You're scared to play with fire

You're scared for what? (I'll know, girl)  
You're scared for what? (Just tell me, baby)
