

Straight into the Fire

Jupiter

I see the light in the darkness
Start of the madness world
Destroy in this city
We can no longer turn back
We are falling black

I hear... you can not live in a place like this
I know... now I know destined to break through the night
Sign a rising sun

It's to be manipulated the a vision
We are all sinners
Even if the world ends
Nothing can change it
I hear... you can not live in a place like this
I know... now I know destined to break
Now I hear

There's no one else to blame
So this is the eternal flame
Destroy... is this wrong desire?
Straight into the fire
You don't devil
Blood's smell
But I feel the warmth of blood
Like stabbing a knife in my chest
I feel... is this venom of venus?

There's no one else to blame
So this is the eternal flame
Destroy... is this wrong desire?
Straight into the fire...
You don't devil
Blood's smell
But I feel the warmth of blood
Like stabbing a knife in my chest
I feel... is this venom of venus?
