Don't hesitate no more
Look me in my eyes
Just let me love you
Let me love you

When there's the indescribable tension
We're parallel to each other
We'll go without a limit
Do it again, do it again baby

Look here, stop caring about the others
Stay here, get closer to me
You can't leave me anyways
Make it sure, make it sure baby

When you feel the thrilling gaze upon you
Your mysterious eyes
Get deeper and deeper
When i let the hands take me
That called me gracefully, our
Our relationship gets deeper and deeper

You only let me do it
I'll always go where you are
Just focus on this moment
We can get a bit more honest

Now focus on me (now focus on me)
Now focus on me (now focus on me)

You and me just focus on this moment
I'll match your tempo
Synchronizing my heartbeats to yours
Whatever we do, I don't care
If it's with you it's okay

Our emotions overlap

No need for explanation, they get bigger
This time we're holding onto each other
Whatever we do, I don't care
If it's with you, it's okay

Under the dimmed lights
Our shadows dance together
It's like it's out of a movie
When we know each other's feelings
We're painting with the moonlight
It's getting close to perfection

Now focus on me (now focus on me)
Now focus on me (now focus on me)

It's blinding
Your reflection on the window
It's sweet
Your breath around my mouth

Now focus on me
Keep your eyes on me
Only you and me
Right in this moment
Only you and me
Now focus on me
Only you and me
Now focus on me
Focus on me
Focus tonight, all night

Don't hesitate no more
Look me in my eyes
Just let me love you
Let me love you
Don't hesitate no more
Look me in my eyes
Just let me love you
Let me love you, oh oh oh yeah
