

# Hailey

Justin Bieber

Had a dream, I was high  
Holdin' on to the sky  
But I heard your voice and stopped myself from fallin'  
There'll be days, there'll be nights  
When the stars don't align  
And the sun can't even stop the rain from pourin'

So lay with me and let time just pass by  
And don't let go (Don't let go)  
'Cause all I know

This life is crazy  
But it led me to your love  
If you call on me forever I will come  
No matter what, baby  
The only thing I'm certain of  
We'll be diamond when our golden days are done  
No matter what (What), no matter what (What)  
It's only us (It's only us)  
Yeah, no matter what

Got you good, in the bag  
Everything that I have  
When the silence fills the air, just know I'm on it  
When the waves start to crash  
Like a fear from the past  
Just remember that you're all I've ever wanted (Ever wanted)

So lay with me and let time just pass by  
And don't let go (Don't let go)  
'Cause all I know (Yeah)

This life is crazy  
But it led me to your love  
If you call on me forever I will come  
No matter what, baby  
The only thing I'm certain of  
We'll be diamond when our golden days are done  
No matter what (What), no matter what (What)  
It's only us (It's only us)  
Yeah (Yeah), no matter what

Lookin' in your eyes  
Can't believe you're mine  
It's beyond an obsession, all of my attention  
Nothing can compare to you (To you)  
What did I do right? (Do right)  
To hold you every night (Every night)  
It's beyond an obsession, all of my attention  
Nothing can compare to you

This life is crazy  
But it led me to your love  
If you call on me forever I will come  
No matter what, baby  
The only thing I'm certain of  
We'll be diamond when our golden days are done (Yeah, ayy)

This life is crazy  
But it led me to your love  
If you call on me forever I will come  
No matter what, baby  
The only thing I'm certain of  
We'll be diamond when our golden days are done  
No matter what, no matter what (Yeah, yeah)  
It's only us (It's only us)  
Yeah, no matter what
