

Spendin' The Night

Justin Moore

Everybody's leavin' and the party's windin' down
All the traffic lights are blinkin' yellow in this town
I know it's late, but it's way too soon
I never get tired of lookin' at you
Clock's got you thinkin' you should be asleep by now

Think you should think about spendin' the night
Right here in the dashboard light
Singin' out the window while I drive these old back roads
Think you should think about spendin' the night
Sky high on a jet black midnight kiss
'Til the sun comes up again
Baby, I could drive you home
But you should think about spendin' the night

Oh yeah

Finish up your drink and let's get out of this place
Show me that smile that says you got time to waste
Who says there's nothin' to do
I think you

Think you should think about spendin' the night
Right here in the dashboard light
Singin' out the window while I drive these old back roads
Think you should think about spendin' the night
Sky high on a jet black midnight kiss
'Til the sun comes up again
Baby, I could drive you home
But you should think about spendin' the night

Killin' time
Where the stars are on fire
Your head on my shoulder
I don't gotta be over

Think you should think about spendin' the night
Right here in the dashboard light
Singin' out the window while I drive these old back roads
Think you should think about spendin' the night
Sky high on a jet black midnight kiss
'Til the sun comes up again
Baby, I could drive you home
But you should think about spendin' the night

Oh baby, spend the night
Think you should think about spendin' the night
Yeah
Think you should think about spendin' the night
