Justin Stone

You were not –
Si- silly

Yo, yo
Checking up on my other competition
Got 'em lookin' like they're ready to quit
Livin' like a rapper, foot down on the pedal
Guess it leaves a mark, when you finally let reality hit
No valet, no cash, when I'm parking my whip
You SB Mike, when I started this trip
Started this rise, wanna see my demise
But, I am feeling like it is my time in this game
Wrote down my pain
All of my feelings, been trapped on this page
Pushed all my demons away
Fam I know, me and him ain't the same
Maybe that's progress? Maybe I digress too much?
Can't seem to ever find love from the lust
I know, I know, yeah, my ego's too tough
Life is a wave, but, I'm stuck in the current
The current so crowded, I'm drowning, I'm going down
Brother said its life, I'm holdin' on you
You miss the old me now, of course you say I'm the same
But you judging the old me, dude that's ironic

You say that you love me
You say that you care
But, you were not there in the switch
You were not there in the switch
Yeah
You were not there in the switch
You were not there in the switch
Yeah, yeah, yeah
You were not there in the switch
You were not there in the switch

I've been goin' through a lot
You gon' see me on the top, 'cause I changed
Industry locked me away
Time paid in full, so I tear up that page with my pen
God, forgive all my sins
Swear that they won't ever happen again
But, I am lyin' to you
I am not perfect I'll screw up again and that's okay
Lately I'm tryin' though
Face from the inside is cryin' though
Gave you my heart and what's left of me
Something here feels like my destiny

'Cause they say that they love me
They say that they care
But, they were not there in the switch
They were not there in the switch
Yeah
They were not there in the switch
They were not there in the switch
Yeah, yeah, yeah

```
They were not there in the switch
They were not there in the switch

You were right here in the switch
You were right here in the switch
You were right here in the switch
You were right here in the switch
Yeah
```
