

Constellation

Justincase

I set you right back in your place
And put you right back where you came
And let you think about your life
And let you realize what you're like

Oh, it's something that he didn't know

Did you ever want to be the only star in the constellation?
Did you ever want to be the furthest from this situation?
Yeah, the constellation

In these times of different moods
They come from all those interludes
Like the girl you thought you'd need
And like the man you'd wish you'd be

Oh, it's something that he didn't know

You better watch, better watch
What you do
You better watch, better watch
What you say
What you say
