

# It Was Something

Justincase

I took a ride in the back seat of her car  
We stopped at the corner to see the local bar  
I saw them dance and sing all their lovely song  
And I asked myself "Why aren't you smiling, what's wrong?"  
It's got something to do with not having it all together  
It's got something to do with not having it all together

It was something good she left behind  
It was something pure she changed my mind  
It was something good she let me find  
I always get behind and I'm leavin' mine

Now that I drive so slow I can't get hurt  
A rear end is much better than a head on heart  
I keep my mirror in focus and my head high  
Just in case I see you with the girl in the sky  
It's got something to do with not having it all together  
It's got everything to do with not being all together

Give me Give me enough to know  
Give me Give me that something's right  
Give me Give me enough to know  
Give me Give me I'll sleep the night
