

Acetaminophen

K.Flaj

It's a cold world we're living in
Feel myself giving in
Drink, drink, shot, shot
Acetaminophen is what I'll be needing if I keep it up
Tomorrow morning but I'm warning you I could give a fuck
See I'm living on the edge of things til my mind is wrecked
Say you'll give me all those better things
Breathing on my neck
Got drugs in my purse and stars in my eyes
Been thinking all this over and I've come to realize
You only like me when you're drunk
All us girls we look the same
I'm just the flavor of the month
Tomorrow you'll forget my name
You only like me when I'm drunk
All us girls we look the same
I'm just the flavor of the month
Tomorrow you'll forget my name
It's getting hot up in this room so
Let's treat the party like it's carryout, to go
What we'll do who knows
Kudos, congratulations, my regards
You got me in your pocket now let's hop inside your car
See I'm living on the edge of things til my mind is wrecked
Say you'll give me all those better things
Breathing on my neck
Got drugs in my purse and stars in my eyes
Been thinking all this over and I've come to realize
You only like me when you're drunk
All us girls we look the same
I'm just the flavor of the month
Tomorrow you'll forget my name
You only like me when I'm drunk
All us girls we look the same
I'm just the flavor of the month
Tomorrow you'll forget my name
