

Black Wave

K.Flav

Black wave coming, will it hit?
I can taste the fear, yeah, it's written on my lips
Sipping on a cold one, waiting on the rinse
Woke up with an omen tatted on my wrist
Black wave coming, will it drop?
I can see the fear, yeah, it's written on the wall
Who you gonna trust when the killer is the cop?
Fire in my bloodstream, water in my lungs

Waiting on a black wave, running in a rat maze
Shaking in my own cage, what do I believe, I believe?
Waiting on a black wave, living under bad days
Shaking in my own cage, what do I believe?
Stumbling down the street
I swear to God, you don't wanna test me
Don't test me

Black wave blocking out the sun
Baby, when you go down, ain't no coming up
Thought that you were safe but nobody ever was
Choking on a diamond, poison in your lungs
At the end, guess we're all just animals
At the end, is it all just greed?
When the ocean crash down, who you gonna call?
Hold your breath, hold your breath, counting 1, 2

Waiting on a black wave, running in a rat maze
Shaking in my own cage, what do I believe, I believe?
Waiting on a black wave, living under bad days
Shaking in my own cage, what do I believe?
Stumbling down the street
I swear to God, you don't wanna test me
Don't test me
Don't test me

How did a girl like me end up in a world so mean?
How did a girl like me end up in a world so mean?

Don't test me
Don't test me
Don't test me
