

The Reason

K'jon

I've got a funny look upon my face
I cant understand the meanings of the words you want to say
I know you're so hard to communicate
but it seems your lips I swear it's harder than Chinese arithmetic

Everytime you say I can't
I act like I don't understand
Its just does something to my blood
You're the reason why I work harder
Everytime you say I can't
I act like I don't understand
Its just does something to my blood
You're the reason why I work harder
I want to thank you because
you're the reason why I work harder
that's the motivating factors in my life
sometimes I toss and turn
and wonder why
Oh oh
I hear some whispering but i got a sickness
its called selective hearing
yeah so I take what I can use and put it to good use
and it feel so good to my soul, like some soul food
and it feels good to my soul

what's the oldest rule of what you should not
well you should never ever tell a grown man
what he should not do
or he may just do
what you told him not to do
and he just may succeed
at everything he wanted to be

Everytime you say I can't
I act like I don't understand
Its just does something to my blood
You're the reason why I work harder
Everytime you say I can't
I act like I don't understand
Its just does something to my blood
You're the reason why I work harder
Sometimes I feel like giving up cause its just too much
but its something you said to me that gave me energy
so you see you really made me
now I believe anything is possible
and so I had to let you know

oh oh
ohh oh silly kids
You're the reason I work harder
I want to thank you because (I want thank you because)
Everytime you say I can't
I act like I don't understand
it just does something my blood
you're the reason
you're the reason

Everytime you say I can't
I act like I don't understand
'cause it just does something to my blood
you're the reason I work harder
