Time

K. Michelle

In a perfect world You would never let me down There'd would be nothing to figure out In a perfect world We could just erase the day Never say the things we said Two things you can't get back, our words and time Alright

Tell me how to find somebody Who gon be on time on time It's too late for you and I Thank God I left you right on time, on time Time, time Kissing you goodbye And I did it right on time On time

In a perfect world You would try to prove your love Take me to the stars above In a perfect world, perfect world, perfect world We would put each other first Make it so it never hurts Two things you can't get back, our words and time

Second hand, minute hand Clock is winding down, every second counts What's your plan? Where you stay? Here I go again, worrying about you before me This time I'm a get everything that I need Always mad, baby, why you always mad? I just need a break from that tit for tat

Tell me how to find somebody Who gon be on time on time It's too late for you and I Thank God I left you right on time, on time Time, time Kissing you goodbye And I did it right on time On time
