

# Let's Run Away

K-Trap

Let's run away  
Baby, you and I  
I can leave the streets and hustling behind  
Let's run away (Let's run away)  
I ain't gotta think twice  
'Cause it's never green around the other side, yeah

Baby, we'll be alright  
Living on the edge, but we love life (Love life)  
I be running rave for the hot spice (Hot spice)  
Running from the feds, I do not lie  
Lock out for a whole night, yeah  
'Cause I never told her my whole life (Whole life)  
Praying I get bail, mama, don't cry (Don't cry, don't cry)

Let's run away  
Baby, you and I  
I can leave the streets and hustling behind  
Let's run away  
I ain't gotta think twice  
'Cause it's never green around the other side

Lost so many friends in all different ways  
To the grave, to the jails, it's all different pain  
I used to shoot and sell drugs, now this a different stage  
Half a ticket last summer, I just hit the stage  
Eighteen months and I ain't done the re-up, neither seen the press  
Saw that glizzy 'bout twice, man, I'm still impressed  
So many tests and I'm still my best  
I get to work and feel alone, that's when I feel the best  
I was gainin' weight and confidence was gettin' low  
I was hidin' it with Louis and these VS stones  
I remember the car was full when I was still alone  
I found out some true colours, now I'm feelin' cold  
Boy, it's crazy when there's nothin' that you didn't know  
But, it hits different when they get exposed  
I really grown and I know they want me to fold  
I ain't gotta pack my bags, I'm ready to go

Let's run away (Run)  
Baby, you and I (I can leave)  
I can leave the streets and hustling behind (Let's run away)  
Let's run away  
I ain't gotta think twice  
'Cause it's never green around the other side

Me and her parted ways, now there's echoes in the crib  
Henny in my cup, barely nothin' in the fridge  
Thoughts in my head, hollows in my clip  
Heart on my sleeve, you can't tell me how to live, only if we got the same p  
ain (Same pain), same wage  
Cartier and pointers 'round the edges, not the plain frames  
I had dreams of it, multi, so even on my lowest, thank the most high  
Most nights, I wish that I could run away  
Then I bottle it and tell myself, "Another day"  
Or maybe I can handle shit another way  
Or maybe I should stop listenin' to what the others say

Life hurts, but I'm gonna make sure that life works  
Gotta take the right turn, my nigga really died first  
Run away, before I walk out, I wipe my eyes first ('Cah they can't see my cry)

(Baby, let's run) Let's run away  
Baby, you and I  
I can leave the streets and hustling behind (Let's run away)  
Let's run away  
I ain't gotta think twice  
'Cause it's never green around the other side
