

Building

K.A.A.N.

Blev

Tell 'em we evil, we feast in hell it's not no problem
Wonder why a nigga had to go so hard, I ain't have no options
Got sick of the bullshit that I never tolerate, it made me nauseous

Gotta watch for the snakes in the grass, I cut the head off of a serpent

Shit I had to tell them motherfuckers start working

Grinding, stacking, better yet building

Get lost in the lights you might

I want my name on the front of the goddamn building

I'ma make it out if it don't kill me

Cold blooded I ain't got no feelings

Had to tell them motherfuckers start working

Grinding, stacking, better yet building

I been on a quest for weeks, I'm in need of the necessities
I'm feeling like money ain't enough for me

A one of one, a diamond in the rough is what you see

A nigga been cooking everything for the seed

Allow me to proceed and prosper, please call a doctor

They taking niggas out, it's the graveyard or locked up

Your third eye blind, they been blocked your chakras

All of this shit is ladies or actors with Oscars

We want the high life with the caviar and the lobsters

The type of shit that they put in the movies with the mobsters

A couple loony niggas off of they meds in the Mazda

Conversating conspiracy theories, plotting the contra'

Mausoleums they built for the god of war, he's a monster

Monetizing Obama's and might as well talk to the problems

A man that made more than the minimum of the profits

I told them motherfuckers I got it

Tell 'em we evil, we feast in hell it's not no problem

Wonder why a nigga had to go so hard, I ain't have no options

Got sick of the bullshit that I never tolerate, it made me nauseous

Gotta watch for the snakes in the grass, I cut the head off of a serpent

Shit I had to tell them motherfuckers start working

Grinding, stacking, better yet building

Get lost in the lights you might

I want my name on the front of the goddamn building

I'ma make it out if it don't kill me

Cold blooded I ain't got no feelings

Had to tell them motherfuckers start working
