Live how you want, feel how you feel
Do what you love, do what you love
Live how you want, feel how you feel
Do what you love, do what you love
Live how you want, feel how you feel
Do what you love, do what you love
Live how you want, feel how you feel
Do what you love, do what you love

Next day might not come, you ain't heard
You been advanced, you been advanced
Might stay, might go, can't leave, I know
My fate protects me, my fate protects me
Stay strong, I will for this shall pass
Pass, life goes on, don't nothing last
Last, hold my tongue, nah can't do that
Starve for this truth, I proceed to search
Lost in the depths of this endless work
For what it's worth, it's worth it
I do nothin' else
Deal with the consequences, I know
Pole vault then ascend to heights like I'm gone
My God, my relentless fight is too strong
My sights on a goal to reach is unknown
Through it all I-

Live how you want, feel how you feel
Do what you love, do what you love
Live how you want, feel how you feel
Do what you love, do what you love
Live how you want, feel how you feel
Do what you love, do what you love
Live how you want

Hope I never fall or fade baby, ahhh
You can call me everything but crazy, ahhh
Hope I never fall or fade baby, ahhh
You can call me everything but crazy, ahhh
Hope I never fall or fade baby

So what's the life you're speaking of
Refined contentment creeping up
Align the stars and constellations
Equip my focus, keep it steady, aim it ready, fire, I
See myself as something more, aspire
Never low, residing high in spite
I-
