

# Invisible Man

Kadebostany

I'll be there next to you  
I'll be your hidden light in the dark  
If you take the time to look around  
If you take the time to look around  
I know you feel sad, it's hard nobody understands you  
I'll be your light in the dark  
I'll be your light in the dark

I know what you've been through  
I'm your one and only friend  
I'm an invisible man

I know what you've been through  
I'm your one and only friend  
I'm an invisible man

Look at the sky  
And try to grab a star  
No matter if you shy  
The end is not far  
Look at the light  
No need to fight  
We have a solution  
It's not an illusion  
Just listen to my voice that would show you the way  
Sometimes it's hard for you to survive  
Everything seems so grey  
You don't know why but you gotta believe in me  
I know you will be free  
Just count 'til one two three

I know what you've been through  
I'm your one and only friend  
I'm an invisible man

I know what you've been through  
I'm your one and only friend  
I'm an invisible man

I'll be there next to you  
I'll be your hidden light in the dark  
if you take the time to look around  
if you take the time to look around  
I'll be your light in the dark

I know what you've been through  
I'm your one and only friend  
I'm an invisible man

I know what you've been through  
I'm your one and only friend  
I'm an invisible man
