

Down With The Ship

Kailee Morgue

All my friends are dying
And Los Angeles is crying
When I'm driving in
So much for making history
When this whole god damn city's
Gonna be in the deep end

It's a full speed existential crisis
Why should I even fight this
If we're damned
I've been going off the rails
But they said that helps the sales
So here I am

Hey you haven't you heard
The world's on fire and we're watching it burn
Yeah I know I don't give a shit
If we're going down I'm going down with it
Life's good I can't complain
The world's on fire and we're going insane
Yeah I know I started this shit
Middle finger's up going down with the ship

The rich are in their mansions
Taking selfie's in the canyon
Over milk they spilt
And what a great example
While we're begging to dismantle
Everything they built

It's a full speed existential crisis
Why should I even fight this
I know I can't
I've been going off the rails
'Cause they said that helps the sales
So I light the match

Hey you haven't you heard
The world's on fire and we're watching it burn
Yeah I know I don't give a shit
If we're going down I'm going down with it
Life's good I can't complain
The world's on fire and we're going insane
Yeah I know I started this shit
Middle finger's up going down with the ship
Middle finger's up going down with the ship

Hey you haven't you heard
The world's on fire and we're watching it burn
Yeah I know I started this shit
Middle finger's up going down with the ship
