advantages

KAMAUU

(Gimme love)
(All I want)
(Symbiosis)

Give you love, all the love, all that I can give
Give me love, I need, all that is given
All my life, all I want is symbioses
Give me advantages, I give you advantages

Call me when you want it bodily
You've got keys to a whole different side of me
Suddenly silently on the low low
In your garden I sow privately
I talk to god when inside of that
I felt at home in that environment
I protect that environment by any means

We don't waste it
When you got it savor me
We don't race there
When it's slow it tastes lovely
Take
Take what you want, you can take
If I ain't got it we can make
We just might put it on tape
Ooh

Give you love, all the love, all that I can give
Give me love, I need, all that is given
All my life, all I want is symbioses
Give me advantages, I give you advantages

Hit my line when it's late in the lunar
You lonely, I leap out of bed just to lay with you
Li-Li-Li-Libate your lotus
Unlock you out of your lingerie
Into lunacy, Yeleleh
I love when we get lost in
All this loving in that's bubbling and elevating
Let's get lifted and out of our heads
Don't you loosen your legs

We don't waste it
When you got it savor me
We don't race there
When it's slow it tastes lovely
Take
Take what you want, you can take
If I ain't got it we can make
We just might put it on tape
Ooh

Give you love, all the love, all that I can give
Give me love, I need, all that is given
All my life, all I want is symbioses
Give me advantages, I give you advantages
Give you love, all the love, all that I can give

Give me love, I need, all that is given
All my life, all I want is symbioses
Give me advantages, I give you advantages

Make me wanna raise a daughter and a son now
Can't afford it but I'm wanting it somehow
Can't avoid it, how I want you when the sun's out
I enjoy how you love it when the sun shines
I just wanna see you flourish in the sun shine
I don't wanna put not borders on your sun shine
I give you words of affirmation when the sun's down
We make wave high enough to make the sun drown
