

# Back Around

Kane Brown

Gas station flowers and two wild hearts  
All tangled up like Mamaw's yarn  
That song came on, and we both knew  
It'd be the one that we'd dance to

Then Lover's Lane, where we'd go park  
Turned into Heartbreak Boulevard  
Just when I'm finally over you  
You show up right on cue

What goes around comes back around  
You left me for him, and he left town  
And now that Lonely is your only friend  
You want what you had again, I guess

What goes around comes back around  
Look who it is, calling me right now  
After all those texts you left on "Read"  
Girl, don't forget  
What goes around comes back around

Now you're in the same damn boat  
You left me in six months ago  
You call it "karma", call it "faith"  
But the truth is either way

What goes around comes back around  
You left me for him, and he left town  
And now that Lonely is your only friend  
You want what you had again, I guess

What goes around comes back around  
Look who it is, calling me right now  
After all those texts you left on "Read"  
Girl, don't forget  
What goes around comes back around

Yeah, comes back around

What goes around comes back around  
You left me for him, and he left town  
And now that Lonely is your only friend  
You want what you had again, I guess

What goes around comes back around  
Look who it is, calling me right now  
After all those texts you left on "Read"  
Girl, don't forget  
What goes around comes back around  
Yeah, comes back around
