

I Can Feel It

Kane Brown

I can see you by the bar
Skinny margarita with a broken heart
So, I slid over like a steel guitar
We started talking till I
Saw your boots bounce to the beat
You said, "Do you dance? Wanna dance with me?"
Next thing I know, I started to think
That we might be onto something

You're putting on a show
No need to take it slow
There's something here, I know

I can feel it in the air, feel it in the whiskey in my hand
In your hips, your body tells me when you start to dance
Maybe this is turning to a "We should probably get up out of here"
Oh, baby, I swear, I can feel it in the air
I can feel it
I can feel it

You got everybody looking
Looking at you, looking at me
Them words you're whispering in my ear
Girl, they're as smooth as Tennessee

We got all night to go
This flame ain't burning low
There's something here I know

'Cause I can feel it in the air, feel it in the whiskey in my hand
In your hips, your body tells me when you start to dance
Maybe this is turning to a "We should probably get up out of here"
Oh, baby, I swear, I can feel it in the air
I can feel it
I can feel it in the air

I can feel it coming in the air tonight
Oh, Lord

'Cause I can feel it in the air, feel it in the whiskey in my hand
In your hips, your body tells me when you start to dance
Maybe this is turning to a "We should probably get up out of here"
Oh, baby, I swear, I can feel it in the air
I can feel it
I can feel it
I can feel it in the air
I can feel it
I can feel it
Say, I can feel it in the air
I can feel it
I can feel it
