

Full Moon, Hungry Sun

Kane Strang

One on your hand
And another in your heart
Boy you taking more out
But only one make the sound
One in your head
And another in your bed
Oh you thinking about it all

They won't leave you alone
They won't leave you alone
No they won't leave you alone
No they won't leave you alone

One at your lips
And another at your hip
And you trying to bear
But consider you as a friend
One on your mind and they there all the time
You've been trying to let go

They won't leave you alone
They won't leave you alone
No they won't leave you alone
No they won't leave you alone
No they won't leave you alone
No they won't leave you alone
