

Maybelline

Karmin

I see a picture perfect world
Seems like I can't escape it
Each turn the writing on the wall
Tells me to face the music

I can't compete although I try
Too far below the surface
Bright lights are never what they seem
You've got to see in person

I don't know what they see when they look at me
I don't care but they all see it differently
I don't know what they see when they look at me
But I can hear them say

Go vogue for your life like you must be seen
Pose like the pictures in the magazine
Yeah, beauty is pain but the pleasure's free
Born to be loved like a Maybelline

Look what the photoshop made up
Now shop the photo's make up
We learn at such an early age
Admire but don't be jealous

I saw a pretty girl by the side of the road
Thumb up in the air and a winter coat
I knew that she was carrying a heavier load
I thought that I could get her where she wanted to go
She looked so good with a dangerous style and
I liked the way she talked with a magical smile
She said, "I could be a star if the planets align"
So I took her on a ride to deliver the shine
