ALCHEMIST

Kasabian

Trying to get away from
The burning in my head
Water hits the rocks
Tide came in

Slow hallucination
Starlights on the sea
I don't wanna stop
Take me too

To a time that we all could believe in
Shut the door on your way if you're leaving
All we heard was the sound of the guns
Just can't take it, take it no more

I was down for the count, needed healing
All the cuts to my heart, they were bleeding
All the words that I want you to say
Just can't take it, take it no more

In my head, I saw no way before
Try to runaway, don't wanna wait no more
The light behind your eyes still shines on, on
This time

And I don't understand the words I hear
After all we've got to let go of the things we fear
And the light behind your eyes still shines on

This time
This time
My time
My time

(The light behind your eyes still shines on, on)

Trying to get away from
The burning in my head
Water hits the rocks
Water hits the rocks
Water hits the rocks
Water hits the rocks
Water hits the rocks
Water hits the rocks
