

# All Through the Night

Kasabian

All through the night, I see her as a confusion  
Love seems to be a distant light  
Long was the road, for your heart was an illusion  
Haven't figured out the way you roll

I'm tired of sleeping in the day  
Tried to look the other way  
All I ever hear is you call my name, call my name

Call my name (all through the night)  
Call my name (all through the night)

Down in the woods you can hear the wolves are howling  
Climbing up the walls again tonight  
Throw on some shades, mooch around, do some prowling  
Nothing seems as good as it once was

I'm walking in a trance, you see  
Caught in her electricity  
All I ever hear is you call my name, call my name

Call my name (all through the night)  
Call my name (all through the night)  
Call my name (all through the night)  
She could always make the bed bugs bite

Call my name (all through the night)  
Call my name (all through the night)  
Call my name (all through the night)  
Had enough I'm turning out the lights
